Action Plan 2022-23

The Women Development Cell of Maharashtra College of Arts, Science and Commerce is always eager to encourage our girl students to come forward and progress in life. For this we chalk out a plan at the very beginning of the year and we execute it in letter and spirit. As the world recovered from the Covid-19, the academic year 2022-23 started with a new zeal and enthusiasm – with a little fear and anxiety as well. Here is a list of the programmes that we aim to achieve in this academic year:

1. Menstrual Hygiene is a very important issue that we want to focus on. We would like to invite speakers on this topic and conduct lectures, so that the girl students become aware of the importance of this topic and they are able to live a clean and healthy life.
2. Crimes against women are increasing day by day. We want to organize quiz on this topic as it has become very necessary to make women aware of the fraudsters and tricksters.
3. We would like to collaborate with some NGO to teach our girl students some art or craft which could be useful for them in their professional life.
4. We also aim to conduct a programme on the topic of safe work culture for women.
5. Certain diseases are particularly spreading among people rapidly these days. We would like to conduct a programme on awareness regarding such diseases like Cancer, Tuberculosis etc.
6. We would like to celebrate days like Women's Equality Day and International Women's day in such a way that we are able to deliver a message to women to rise and fight for their rights, and to inspire men to respect women and honour them always.
